

Update your home with

Dark-Sky-Friendly Lighting

Save money and reduce your carbon footprint!

Use LED BULBS - they use the least power and last the longest

- **Warm or Soft** color (3000 Kelvins or less) - healthier, attract fewer bugs
- Dimmable bulbs give you more options

Consider these CONTROLS

- | | |
|------------------------|--|
| A. Dimmer | - use more or less light, as needed |
| B. Timer | - turn on/off at the times you set (digital or mechanical) |
| C. Motion sensor | - turn on for a period of time when motion is sensed |
| D. Dusk-to-dawn sensor | - automatically dim or turn on/off, based on level of daylight |
| E. Smart bulb | - connected to WiFi, use app to turn on/off or program |

GE Relax LED bulbs
\$12.98 for 4 at Lowe's

Replace FIXTURES with dark-sky-friendly models

Wall: Westinghouse 6204400 - \$59 (Lowe's)
